SUMMARY

Software engineer and founder specializing in SaaS development (frontend, backend, deployment, and subscription billing). Turns MVPs into scalable products people love to use. Shipped an AI SaaS with 80+ MAU and CAD\$500+ MRR; maintaining open-source software used by 10k+ sites (1.9k+ GitHub stars, 100k+ downloads).

WORK EXPERIENCE

Pwno Mar. 2025 – Jan. 2026
Co-founder & Lead Engineer Montreal, QC

- Shipped an AI SaaS for memory bug detection, including UI/UX, frontend, and application backend development.
- Built core full-stack infrastructure, implementing secure auth, RBAC, and Stripe billing.
- Integrated LangGraph and LangSmith into the dashboard to visualize AI agent workflows.

AI SaaS Platform Jan. 2023 – Present
Founder Montreal, QC

- Launched a subscription AI app using OpenAI APIs (chat + video) with Next.js, Postgres, and Redis.
- 80+ monthly active users, CAD\$400+ MRR.

EDUCATION

McGill University Sep. 2026 – Expected Jun. 2030
Computer Engineering, Bachelor of Engineering Montreal, QC

Dawson College Sep. 2024 – Expected Jun. 2026
Science, Computer Science and Mathematics, DEC Montreal, QC

- Relevant course work: Data Structure, Software Engineering, Algorithms, Artificial Intelligence.

PROJECTS

"Lumon" Personal AI Assistant Feb. 2025

- Built a multi-agent assistant (conductor/worker architecture) to orchestrate specialized AI agents.
- Implemented long-term memory using a FAISS vector store with persisted embeddings and semantic retrieval.
- Designed robust prompt and tooling systems to ensure correct tool execution and reliability.

hexo-theme-redefine Dec. 2022 – Present

- Built and maintain a popular Hexo blog theme (1.9k+ GitHub stars, 100k+ downloads, ~2k monthly users).
- Resolved 200+ GitHub issues (bugs + feature requests) and managed releases.

Evanovation Infrastructure Sep. 2024 – Present

- Engineered self-hosted infrastructure (Docker, Traefik) managing 10+ secure Postgres/Redis instances.
- Built a FastAPI admin API to monitor and manage database instance lifecycles.

SKILLS

- Front-End:** TypeScript, React, Next.js, Tailwind CSS
- Back-End:** Python, FastAPI, Node.js/Express
- Databases:** PostgreSQL, Redis
- ML/Data:** Python, pandas, NumPy, scikit-learn, LightGBM, evaluation (ROC/PR AUC), SMOTE
- AI/LLM:** OpenAI APIs, LangChain, LangGraph, FAISS
- Systems & Tools:** Git, Docker, Traefik, CI/CD, Auth, RBAC, Stripe billing, monitoring
